

DSWM A1.03 DTS OVER METAL PANEL WITH EPS INFILL STRIPS - SUPPLEMENTAL MECHANICAL ATTACHMENT FOR EPS STRIP INFILL

DECOPLAST DTS METAL PANEL - 6/1/2016

- NOTES:
1. To ensure a continuous air barrier across the building envelope, a continuous air seal should be made at each substrate change, joints/gaps, penetrations and dissimilar material terminations. These must be a consideration of the designer in the overall wall assembly design.
 2. Metal panels should be cleaned with a mild detergent to remove manufacturing or shipping oils, bond breakers and debris prior to any installation.
 3. Fastener must penetrate metal panel by 1/2". Length of fastener TBD by EPS Infill Strip thickness. Gauge of metal panel to determine type of fastener.

Disclaimer: The design, specifications, and construction shall comply with all local building codes and standards. Decoplast installation guidelines are for general information and guidance only and Decoplast specifically disclaims any liability for the use of this design, and for design, engineering, or workmanship of any project. The assembly shall be designed to prevent condensation within the assembly. The designer and the user shall provide final drawings and specifications. Products shown other than those manufactured by Decoplast are shown for clarity of the Decoplast product only. Contact the manufacturer of such other products for installation instructions.
