

Greenmaker® Industries / Decoplast, the leader in Exterior Insulation & Finishing Systems and Coatings, and ARCOM, the leader in specifications, are pleased to announce that Decoplast product data and customized specifications are now available through ARCOM's software platforms to architects, engineers and design professionals.

MasterSpec®, a product of the American Institute of Architects (AIA), is the ultimate resource for producing specifications your way. With master guide specifications, delete what doesn't apply, add your own customizations, and rest assured that your specs are current and complete.

With MasterSpec, you can write the specs your client needs with the turnaround your project timeline demands.

Comprehensive Specifications — Get all the information you need to produce quality specs: More sections, more research, more guidance, more unbiased product info.

Cost-effective Solutions — Choose options that give you everything you need and only what you need in one site license.

Accurate Information — Trust your specs: Researched and written by expert spec writers and editors; regularly reviewed by independent peer committees.

Industry Recognized — Count on the reliability of a specification system endorsed or recommended by industry leaders for over 45 years.

Timesaving Tools — Produce spec documents faster and efficiently with easy-to-use software tools and timely background research.

FREE Background Research — Find answers to product, manufacturer, sustainability, and other questions while you write your specs.

FREE Training and Support — Access ARCOM's no-charge, e-learning and independent study opportunities (CE credit available).

Cloud-based Resources — Check out the latest information on reference standards, products, manufacturers, sustainable design, and more — at any time, from anywhere.
