

Metallic Finishes

www.decoplast.com

Shiny Metallics for Interior & Exterior

Decoplast Metallic is a 100% acrylic based exterior and interior coating. Decoplast Metallic finish may be used over approved substrates, properly prepared vertical concrete, stucco, EIFS, masonry, or previously acrylic coated smooth or textured surfaces.

A variety of finish and application options are available; therefore, a Decoplast representative should be consulted during the specification process in order to achieve the design intent / aesthetic.
